

# THERMISTORS

## PTC Radial Lead Types

### Description

NTE's PTC thermistors are small-sized radial lead organic silicon resin thermistors designed for overcurrent and overload protection.

### Product Applications

- Overload and Current Protection of Mini Voltage Transformer Primary Loops, Chargers, Safe Guard Unit and Thunder Surge Protection Circuit for Telecom Apparatus, and Industry-Controlling Exchangers
- Overcurrent Protection for Ammeters, Digital Multimeters, Micro-Electric Machinery, and Transistors

T-02

T-03

## Specifications

Zero Power resistance (at 25°): ±20%

Surge Voltage Withstanding:  $V_{max} \times (1.2 \text{ to } 1.5)$

Restore Time: 60 sec max

Operating Temperature Range: -40° to +125°C

NTE Type No.	Max Operating Voltage $V_{max}$ (V)	Non-Trip Current $I_{nt}$ (mA)		Trip Current @ 25°C $I_t$ (mA)	Resistance @ 25°C ( $\Omega$ )	Max Current $I_{max}$ (A)	Switch Temp $T_C$ (°C)	Diag No.	Dimensions (in/mm)	
		@ 25°C	@ 60°C						D max	T max
