## NTE1551 Integrated Circuit TV Video IF Amp

### **Features:**

- High density one chip integration of vide IF amplifier, video detector, video preamplifier, AGC and AFC circuits. With this IC, compact set designing is possible.
- High performance by built-in phase compensation type synchronous detector circuit.
- As AFC using double balanced phase comparator, the influence to video detection is little.
- Forward RF AGC and reverse RF AGC output pins are attached

**Absolute Maximum Ratings:** ( $T_A = +25^\circ\text{C}$  unless otherwise specified)

Supply Voltage, $V_{CC}$ .....	13.8V
Circuit Voltage, $V_{3-\text{Fin}}, V_{5-\text{Fin}}, V_{6-\text{Fin}}, V_{7-\text{Fin}}$ .....	$V_{11-\text{Fin}}$ to 0V
Circuit Current, $I_{12}$ .....	+1 to -10mA
Circuit Current, $I_4$ .....	0 to -10mA
Power Dissipation, $P_D$ .....	1100mW
Operating Temperature Range, $T_{opt}$ .....	-20° to +70°C
Storage Temperature Range, $T_{stg}$ .....	-55° to +150°C

Note \*. "+" and "-" are flow-in and flow-out currents to/from the circuit.

**Electrical Characteristics:** ( $T_A = +25^\circ\text{C}$ , unless otherwise specified)
